Blanchard to join Austin Area Garden  
Council Conservancy. Voted in April 10.  
Name of club may be changed. (25  
members)

**AMERICAN BEGONIA SOCIETY AND  
SOUTHWEST REGION GET TOGETHER  
IN NEW ORLEANS**

The ABS/SWR Convention was held April 2-8 in New Orleans, Louisiana in the Hilton Hotel with Cindy Moran and Freda Holley serving as co-chairs.

A silent auction in the hospitality room featured books, pictures, and exotic begonias. Bidding was quite active, producing a healthy fundraiser. Nelda Moore, Valerie Morris, Cindy Moran, and others provided many delicious snacks and even meals for the many convention guests. Cindy's strawberries were the best tasting berries produced in the world. She also contributed sandwiches from the tours.

A Celebration of Life honoring Charles Jaros also attracted many to the Hospitality Room known also as the Pontchartrain Room. Don Miller not only talked about the life of Charles Jaros but also about others who passed away suddenly during the year since we met in San Antonio, Texas.

Seminars were well attended during the morning as well as in the evening. Anton Hofnagels of the Netherlands explained how the Naoya Protocol affected his nursery during the hours when he was expected to meet the public. Although the United States did not join, the world is still expected to police all phases of growing plants and improving species in a safe environment, especially keeping soil, flowers, and vegetables safe for human and animal consumption so that our planet remains as a viable habitat.

Mark Hughes from the Royal Botanic Gardens provided pictures of begonias and spoke about current research.

Rosario Rubite from the Philippines showed begonias and other unusual plants that she enjoyed as she went on her dangerous expeditions with others on muddy roads and

up steep mountains. It is in this area that tourists don raincoats and tour an underground cave by boat. Begonias cling to the entrance of this cave.

Rekha Morris, Don Miller, Deborah Garrett, and Linda Tamblyn provided excellent programs for begonia growers before the annual meetings in the Barataria Room. Panel discussions enlightened conventioners on cutting and pruning begonias in addition to giving growing tips and harvesting and drying seeds for a few days or even for 2 weeks. Sulfur plays a part in ridding the seeds of insects.

During the banquet Freda Holley suggested that other regions should prepare a book such as *Hybridizers of the Southwest Region/ABS, 2018*, which was available for, \$7. Hybridizers are also aware of the new plantings for the rising heat of the world and are growing for the future weather patterns.

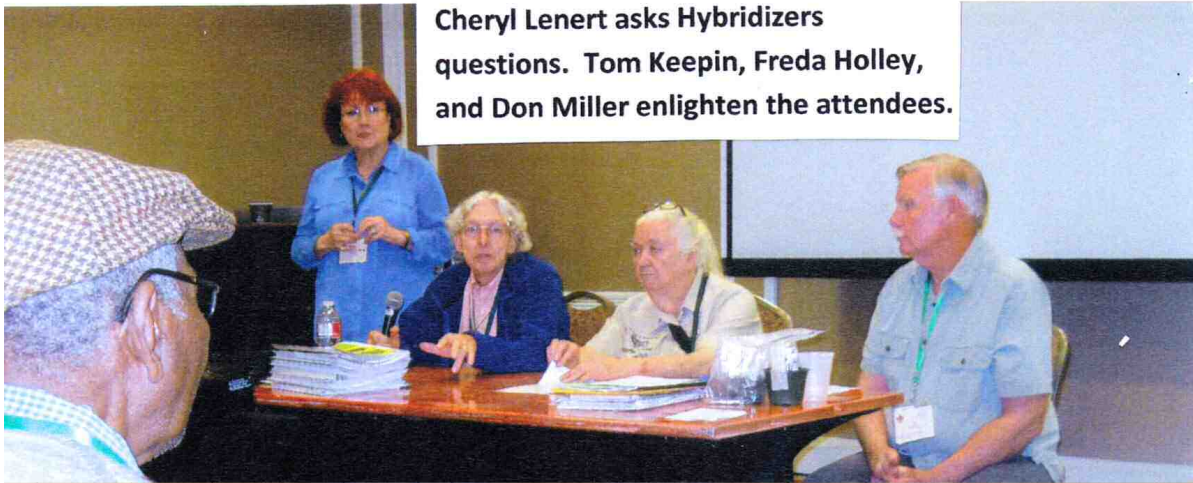

Vickey Cole, Valorie Morris, and Rekha Morris

**B. 'Kit Kat' by Sandy Justice**  
**B. 'Flamingo Queen' by Cindy Moran, who exhibited a plant that received 100 points in the Louisiana Show.**

Cheryl Lenert asks Hybridizers questions. Tom Keepin, Freda Holley, and Don Miller enlighten the attendees.
